

Structure

Information Architecture

Will be a simple one page layout that has all information needed layout in front of the user.

Will allow for future development and possibility of turning into a tree structure layout with future content.

Interaction Design (IXD)

- Site logo will bring user back to the top of the page
Navigation bar will also be fixed to allow ease of use around the site
- Each menu heading will have some sort of roll over to confirm that clicking that area has an action
- Each image in the gallery can be clicked on active a blow up feature to allow the user to see the images in a higher quality
- The contact form allows direct communication to me by email
- Site works on all screens sizes in all screen positions to allow viewing anywhere on any device.
